

## WHEN STRUCK BY TREE SYLVESTER CLARKEN DIES

An unfortunate accident happened at the logging camp of the Bennett Gates Mill, at Water Valley, west of Cremona on Monday afternoon, when Sylvester Clarken, of Macleod, Alta., was instantly killed when struck by a falling tree during logging operations.

Dr. J. L. Clarke of Didsbury was called to the scene of the accident, and decided that no inquest would be necessary.

At the last meeting of the Rugby Red Cross Group, held at the home of Mrs. D. Hoesgood, it was decided to disband, and in future to handle the Red Cross work through the Rugby W.I. Funds on hand will be kept specially for Red Cross use.

## WELCOME HOME FOR SERVICE PERSONNEL IN THEATRE DEC. 28

Members of the various committees of the Didsbury Citizens' Rehabilitation Committee met in C.E. Reiber's office on Thursday evening last to discuss the final Welcome Home Party for the returned service men and women, and plans were made to hold a bang-up affair in the Didsbury Opera House on Friday evening, December 28th, commencing at 8:30 p.m.

The entertainment will take the form of a program, followed by lunch, and a dance with a Calgary orchestra, and the evening's entertainment is free to everyone in the district wishing to attend.

All members of the armed forces, men and women, are especially invited to attend, as well as their parents, sweethearts and friends, and it is anticipated that a record crowd will be on hand to welcome home our boys and girls who have served us so well in the armed forces, both overseas and in Canada.

## MRS. HOGG PRESIDENT OF THE RUGBY W. I.

With an attendance of 12, the last meeting of the Rugby W.I. for this year was held at the home of Mrs. O. Krebs. The financial report showed a balance on the right side and all odds and ends were cleared up, ready for the New Year.

It was decided to send the annual Christmas donation to Woods Home, and also a donation to the "Save the Children" Fund.

At the election of officers Mrs. A. Hogg was chosen president, with Mrs. A. Shannon as vice-president. One new director, Mrs. A. Blain, was chosen, and the three other directors remain as before.

During the afternoon Christmas Carols were sung and one or two Christmas stories were told. The meeting ended with the National Anthem and lunch followed. Soon all were on their way home, to meet again in January at the home of Mrs. Wahl.

Buy T.B. Christmas Seals

## NO MAIL DELIVERIES AT CHRISTMAS AND NEW YEARS

Mr. H. Morgan, local postmaster, has advised that there will be no mail delivery across Canada on Christmas and New Year's Day, and accordingly the Didsbury Post Office will be closed on these days, and the outside entrance will be locked.

Mr. Morgan also advises that all letters and parcels for local delivery should be mailed not later than December 21st, to ensure delivery.

## C.G.I.T. VESPER SERVICE

The C.G.I.T. Christmas Vesper Service will be held in Knox United Church on Monday, December 17th at 8 p.m.

The beauty and significance of the Vesper Service itself, together with the fact that it is National in character, the closest link the local group has with the whole C.G.I.T. movement, have been responsible in large measure for its acceptance by many of the Protestant churches in Canada as an integral part of the Christmas program.

The Vesper Service provides an opportunity for girls to share in a worship experience. It also makes possible the services of a National Girl's Work Secretary. Offerings taken at this time are the only source of support for the National Girl's Work Board's Christmas program.

You are cordially invited to be present at the C.G.I.T. Christmas Vesper Service next Monday night.

## SPRINGSIDE PARTY HONORS MR. & MRS. STAN BROOKE

A real nice crowd gathered at the Springside school on Wednesday evening last to honor Mr. and Mrs. Stanley Brooke, who are leaving to reside in Edmonton, where Stanley has been engaged by a firm specializing in Christmas toys and Archery. Stanley intends to continue his own Western "Archers" in the evening until such time as he can sell the business outright, or possibly carry on his business in Edmonton on a larger scale.

A most pleasant time was enjoyed by Mrs. J. Cathness, Bob McGiffin, and Wm. Collinge. After an enjoyable lunch Mr. Stan Goodburn presided. Mr. and Mrs. Brooke with a purse of \$15, on behalf of those present, along with good wishes for success and happiness in their new home.

Stan has grown up in the district, and Mr. and Mrs. Brooke will leave behind many friends.

Dancing was then resumed until about 3 a.m., when many hands aided the hostess in putting school in order for next day.

## BURNSIDE NEWS NOTES

Excitement ran high in this district last Monday. Apparently there was no mail delivery. Phones rang and enquiries made to locate the mail man. He was traced as far as Mardon's mail box and then apparently disappeared off the face of the earth. Why didn't he come out? Where did he go? Well, it was quite simple. Leaving the aforementioned mail box he broke the clutch pedal and when he did get going he left for home. Here's hoping he made a safe landing.

Little Jessie McCulloch was home from school last week nursing a very sore hand, which had to be bandaged by the doctor.

Mrs. Emily Hunter, an old timer who lived in this district for nearly 40 years, has left her home on the farm to take up residence in Calgary. She was very popular here and took part in all community functions. She will be missed by all who knew her and we wish her happiness.

Mrs. Marie Coates has been confined to her home with the flu. Hurry and get well, Marie. Good people are scarce.

Mr. and Mrs. Alfie Thompson visited with Mr. and Mrs. Joe Clarke last Thursday.

## DIDSBURY LIONS ARE HOSTS TO CALF CLUB AT FINE BANQUET

The Lions Club of Didsbury held a banquet in the Lions Hall last Thursday evening in honor of the Didsbury Dairy Calf Club team who were Toronto visitors. The two lucky members were Cleone Webb and John Parker.

The Lions Hall was beautifully decorated with the patriotic colors and the large table with the guest speakers and the team seated at the head, while two of the previous team winners were present. Dorothy Bruce (now Rogers) and Delbert Levagood. This year makes the third time in twelve years that the Didsbury team has won a trip to Toronto. The first two to go were Delbert Levagood and Tom Clarke; then Dorothy Rogers and Harvey Stevens, and this year our present Webbs of Swallow and John Parker.

The guest speakers of the evening were Mr. Miller of the Youth Activities Branch, who also supervised the team; Mr. A.D. Campbell of the Union Milk Co., Calgary; Mr. Webb of Swallow, who introduced Mr. E.G. Kelly, Mr. Smith of Calgary Power Co., and Mr. Gale, assistant to Mr. Kelly, who spoke on rural electrification and the different areas under test.

After a delicious luncheon the program of the evening got under way with Mr. Tom Morris taking the chair. Mr. A. Reiber led in the singing of a few well-known songs. Mr. Morris presented the club members with their checks. The Jersey donation of ten dollars was presented to Miss Marjory Clarke, while the Crystal Dairy cup for the best calf in the club was presented to Miss Alice May Bruce by Mr. Wordie of the Didsbury Crystal Dairy. Mr. Wordie gave a short account of the Didsbury Dairy industry.

After the guest speakers of the evening, Mr. Morris called on John Parker to give a short account of the trip. As John took the first half, Cleone took the last. They were both very interesting and hands of applause came from the audience.

To close the evening Mr. McPhail showed some very interesting films of "Thoughts for Food" and on "Weeds".

## MELVIN NEWS NOTES

Mrs. Rena Youngs of Edmonton left last week for Ontario where she will spend some time with relatives. Prior to her departure she spent the week ending at the home of her son, Ross Youngs.

Mrs. Inez Shevan of Embro, Ontario, who has been visiting relatives in the west, spent the same week with her cousins, the George Youngs. She returned to her home last week in company with Mrs. Rena Youngs.

Mrs. Clarence Bolton of Hamilton, Ont., has been visiting at the home of her brother, Bill Sumner, and at her father's home in Calgary during the past month. She returned to Ontario last week.

The roads west of town have been seriously hazardous for a result are in a dangerously slippery condition.

We regret that August Krebs has been quite ill during the past week, but hope he is on the mend now.

Mr. and Mrs. A.F. Cowitt succeeded in Christmas dinner a bit since they expect to leave soon on their trip to the U.S. Last Sunday they entertained the relatives at a family dinner. During the afternoon Mr. and Mrs. Lee Sanderson, Mrs. N. Boettger and son visited the gathering.

Don't miss the New Year's dance at Melrose. Music will be supplied by Gardine's orchestra.

Lorne Chandler was a week end visitor at Edmonton.

In the realm of sport the Didsbury Senior hockey team played at Carstairs Monday night and lost to our southern neighbors 4-3. The return game will be played at the Didsbury rink this Friday night.

# OUR COMPLETE SHORT STORY—

## ..And She Be Fair

By DAY RUSSELL

Copyright  
Wheeler Newspaper Syndicate

The grandmotherly face was not a person you could ignore. There was a serenity about her that was almost a kind of radiance. She sat, her black-gloved hands crossed on her lap, in the center of one of the heavy oak double-benches that hyped the length of the art gallery. She gazed quietly at one picture.

The gallery was exhibiting the collection of Harvey J. Collinson, the city's wealthiest citizen, lately deceased. He had collected art, at first with zest and later with discrimination, and he had bequeathed his collection to the city. Now it was being exhibited, old masters and modern, each in their separate rooms, and the rest, a mixed bag of unknowns, in this gallery where the old lady sat.

She had been the first in on this weekday morning but now students were coming in. Two of the older ones, a boy and a girl, slid down into the bench where the old lady sat.

"They should have thrown out some of the stuff in this room too," the boy said at the arrogant stage of his civilities. "Sweet stuff."

"And she be fair," read the girl aloud. "Vivian Gray. Ever heard of him?"

"Never," said the boy. "Didn't just love to throw a young girl down on a bank of flowers and paint her all sweetness and light."

"But she is lovely," said the girl slowly.

The boy nodded with superiority. "Clever of him to give her that Greek close-curl hair. Doesn't date her. Idealized sentiment. But she was never like that."

"But she was!" she started as the old lady turned to them. "You see, I knew her."

Awkwardly, to save fumbling for a reply, they turned to look at the picture again. It was a huge canvas in which a life-sized girl, young and lovely, lay in a patch of mistle sunlit against the shadow of a woodland glade.

"Look at the perfect detail," said the girl.

"Detail doesn't count. Might just as well have a color photograph," said the boy.

"But no," said the old lady, quietly. "No! Can't you see? She is in love."

"Yes," breathed the girl. "Did you know the artist too?"

"Yes. Very well. He painted that picture fifty years ago—in this city."

The boy spoke. "But nobody ever heard of him?"

"It was harder for artists in those days. There was no interest in art."

"No interest?" said the boy quickly. "Collinson bought that picture and I'll bet he paid a pretty price for it."

"Twenty dollars," said the old lady sadly. "That was the first picture he bought, that started his collection. He had to buy others . . . more and more to make that girl seem smaller and less disturbing."

There was a pained expression on the girl's face. "But I don't see . . ."

The old lady went on. "In a way it was that picture that gave this collection to the city."

"A million dollar collection," said the boy.

"And it was because of that girl Harvey Collinson bought the picture. In a way she gave him this collection."

The old lady seemed to search her mind for a date. "1893," she said softly. "That was the year the artist came back from France. He had been left some money and went to Paris and stayed there until his money was gone. He and Harvey Collinson had been school together but Harvey had left school at fourteen to work in his father's machine shop. By the time the artist returned from Paris, Harvey had taken over the business and moved into a brick building. He was full of ambition. He was also engaged to the girl."

The girl whispered. "That is why she looks so happy."

"No," said the old lady. "When the artist returned she broke the engagement. Harvey wouldn't let her go without a fight. He said he would give her everything she could want. He asked what the artist could give her."

"What did the artist say?" The girl hung on the reply.

"He laughed and said, 'I will paint her picture and the one thing every woman is afraid to lose, her youth.'"

The old lady lifted her hand as if to show the two young people how true those words had been.

"Then he quoted that line of Keats . . ."

"Forever will thou love and she be fair."

The boy leaned forward. "Forever she'll be fair! He was right. There is the girl, the model, still young, still perfect, while the artist is forgotten and Collinson is dead."

The old lady waited a moment before she spoke. "Harvey Collinson was angry. He said she was a fool to marry an artist . . . That painting her wouldn't pay their bills. Who did they suppose would buy it?"

"Not you," said the artist. "We'd have to be starving before I'd sell it to you."

The girl whispered the next words. "And he paid only twenty dollars for it."

The old lady lifted her hand again. "It doesn't seem to matter now, does it?"

The boy frowned. "And he never painted another picture anybody ever heard of . . . I don't understand. How could he paint like that and yet nobody ever heard of him as a painter?"

"Sometimes," said the old lady. "I think that fame and love are like oil and water. They do not go together."

She gathered her coat about her and rose. She stood for a moment before the picture. As she turned to go she looked down at the young lovers.

"But we were very happy."

### VERY UNREASONABLE

The man who was applying for a summons against the people next door was very angry.

"What's the trouble?" asked the magistrate's clerk.

"Every night this week they have been banging on the wall and yelling at me till two o'clock in the morning."

"Dear, dear. And does the noise keep you awake?"

"No," explained the applicant; "but I can't enjoy my piano-playing with all that noise going on."

No alphabet exists for most of the scores of dialects spoken by Mexican Indians.

### Alarming Increase

Prairie Provinces Had More Safe-breaking Cases During 1944-45

The return of prosperity to the prairie provinces in recent years apparently proved tempting to the safe-breaking fraternity, for in the years 1944-45 "yeggs blowed" or tampered with safes in 68 places of business in the three provinces.

Only other case of safebreaking reported in Canada in that period occurred in Nova Scotia. The total of 69 was an increase of 41 over the preceding year and is the highest since 1934.

Of the 68 cases recorded in the prairies, 46 were in Alberta, 11 in Saskatchewan and 11 in Manitoba.

Commissioner R. T. Wood, R.C.M.P. head, said that special measures to combat safebreaking are continually being placed in operation. "We had reduced the number of safe-blowing cases to less than 20 a year, but evidently the more prosperous conditions in the west have been too hard to resist for some people. We're hoping it will not be long before the number of cases is down again."

### Outstandingly Good

# "SAFARA" TEA

### Not An Easy Job

Trying To Break Any Speed Record Is Risky Business

Either on the water, on land or in the air, those who attempt to break speed records certainly risk their necks. A meat intriguing story comes from England about what an airman goes through, at two miles an hour, or better, miles a minute.

This writer brings to attention what is known as the "g" factor or element, and notes that the extent of the speed depends on the rate of speed. A 12 st. pilot, at a certain speed, experiences "g2", which means that his weight is doubled. At still higher speed he may experience "g7", which would cause a 12 st. pilot actually to weigh over half a ton. The principle is a simple one—weight multiplied by velocity. Its primitive example is a bucket of water swung round on a rope at a speed that prevents the water spilling.

The water in the bucket multiplies its weight. Remember, too, that the plane is subject to just the same "g" factor. At certain high velocity the "g" factor makes the pilot's blood about the same weight as iron. Reflect what that must mean even momentarily to his heart. In certain rare reverse "g" cases there is negative action. A pilot's eyes have actually been forced out of the sockets. Record-breaking is not all beer and skittles. St. Catharines Standard.

THE "CYCLING MINSTREL"—

It's a common misconception among people who first meet G. Harrison Randall, 31, the Fredrickton Hill-Billy, that he travelled 11,250 miles to Vancouver on a bicycle. Actually, he made the trip on two harmonicas. G. Harrison, who has played 785 shows for seven years, left Fredrickton in May, 1942, "three years and five months ago," with his trusty wheel and about 200 pounds of baggage. He's pushed this load from the Atlantic to the Pacific, often detouring through the U.S. In January he's setting off for Hollywood where he hopes to pose for few pictures. From Hollywood the cycling sereader will head for Miami, then up to Charleston to see his fiancée and then to New Brunswick.

### SMILE AWHILE

The hardest time to get baby to sleep is when she is 18.

"Why do you have such a high bed for your little boy?"

"So that we can hear him if he falls out of it."

"A clever man tells a woman he understands her; a stupid one tries to prove it."

"Doctor, I don't drink or smoke or chase around with women—will I live 100 years?"

"No, but you can live 100 years, but it'll seem like 100."

Jack: "Let's give the bride a shower."

John: "Count me in—I'll bring the soap!"

First Student—"The Principal says he is going to stop smoking in the college."

Second Student—"Huh! Next thing'll be asking us to stop it, too."

At her—"Marilyn, were you a good little girl at church today?"

Marilyn—"Yes, mother. A man offered me a big plate of money, and I said, 'No, thank you.'"

"Has she kept her girlish figure?"

"Kept it? Nan, she has doubled it!"

"I had a surprise this morning," remarked the business man. "I put on another suit, and in one of the pockets found a big roll of bills, which I had entirely forgotten."

Asked a pessimist: "Were any of them received?"

The grocer was making out a list of his requirements

## STRIKES AND HIGHER WAGES WILL HOLD UP POST WAR RECOVERY

The strikes at the leading automobile manufacturers in Canada and the United States have crippled the industry, and at the same time appear to be spreading to other industries across the continent.

The labor unions have done much to obtain higher wages for the laboring class, but there is a limit to all things, and the 30 per cent increase in pay asked for seems to be out of reason. Not that higher wages would not be welcomed by the workers, but they apparently have not stopped to consider future reactions. Should the demands of the labor unions be met it can only lead to one conclusion—inflation. Once the price rise starts it is difficult to say where the end will be, but there is one thing certain—if prices do get out of hand the burden will eventually fall on the primary producers of the country, which in our case is the farmer. In this part of the Dominion farming is the only primary revenue for other industries, and when prices rise, the price of farm products, forest products, mine products, etc., must all go up accordingly. And should this happen what good will inflation do anyone?

There is only one solution to the problem—and that is to maintain the present price ceilings, which include all wages. In other words, the demands of the strikers should not be met, at least until the whole price ceiling basis is gone into and everything raised accordingly. And what a job that would be!

## WORK FOR THOSE WHO WANT IT

The Dominion Department of Labor is advertising for 5,000 bushmen for saw logs and pulpwood.

Northern Ontario despatch says that in one mining area alone there is a shortage of 2,000 workers.

What this seems to mean is that when people talk about a current scarcity of jobs they mean scarcity of selected jobs. A scarcity of the sort of work people would like to get if they could get it.

Well, there never has been a time in the world's history when there was work for everybody at the sort of work everybody wanted, and there never will be. Indeed, in such a world economic and social life would break down; there would be nobody to do the hard, disagreeable work essential to existence.

We can't all choose the posts in life that we would like, even though we may think we could fill them better than those who have them; can't all crowd the far-away pastures that look green. Instead, in a world where most of us have to earn our living by the sweat of our brow we must be content with our appointed tasks, realizing that life is a procession of second-best choices, and realizing most of all that, duty to ourselves and our dependents being what it is, any work is better than none.

We hear much these days about "full employment". That (if it is attainable at all which we doubt) doesn't mean work for everybody at the jobs they like, or a home for everybody in the place they like. Full employment means that people must move to jobs, not jobs to people, and that there must be enough people willing to take all the sort of jobs that are offered. In a collective state, towards which we seem to be moving, full employment may even mean that people must work at what they are told to work at, where they are told to work, and at what hours and wages.—Ottawa Journal.

### NOTICE TO HOG SHIPPERS—

The Mountain View Co-Operative Livestock Shipping Association will not ship hogs during Christmas week.

The next Hogs taken will be January 2, 1946.

### SEED TREATMENT

(By H.G.L. Strange)

The modern method of seed treatment is by the use of Mercurial Dust—Ceresan or Leytossan. This treatment is not only effective against smut, but in addition does much to protect the seed against damage from certain other plant diseases carried in the seed, commonly called root rot, and in addition Mercurial Dust envelops the seed in a protective film which helps to guard it against certain harmful organisms that are present in the soil commonly called soil-borne diseases. Mercurial Dust, furthermore, as I know from experiments made with thousands of bushels of wheat seed that were free from smut, tends to increase germination and to give a stronger plant; thereby, of course, tending to increase yield and the grade of the grain. So varied are the advantages that come from the use of Mercurial Dust, that even though the farmer may be quite certain that his seed contain no smut spores, yet my own definite opinion is that it would still pay him handsomely to treat all his seed with Mercurial Dust—Ceresan or Leytossan are, however, somewhat scarce. Farmers who need it should, I suggest, place an order with their local dealer as soon as possible so that he in turn can have supplies brought in.

### LONG YEARS AGO

December 11, 1903

A new post office was opened up east of Didsbury, on Saturday. It will be known as Sunnyslope post office.

The Town Council has at last ordered some fire fighting equipment, and has authorized the purchase of 20 Victor Fire Extinguishers.

At the annual meeting of the Agricultural Society C. Hiebert was elected president; E.M. Shantz, 1st vice-president; Wm. Rupp, 2nd vice-president.

From six to ten coal wagons are passing through Sunnyslope daily, loaded with coal for Didsbury.

Ernest Cashel, who is under sentence of death in the Calgary Jail for the murder of Bill, and who was to be executed Tuesday next, has escaped. He locked his three guards in a cell, secured their arms and ammunition, and made good his escape.

### NOTES FROM THE EAST

#### LAST WEEK

Lone Pine W.I. Bazaar and dance on November 30 was a big success. The weather man supplied a lovely evening and a very large crowd attended the affair, from Carleton Place, Selkirkville and Didsbury, not to mention all from Jutland and Lone Pine.

The program was short and the item provided by the Selkirkville school "Building Pyramids" was enjoyed very much. The auction sale netted the W.I. approximately \$85, and the cushion raffle won by Buddy Richardson, netted \$34. The ladies were more than pleased with the returns, and wish to extend thanks to Mrs. E. Hunter who donated the cushion, and to "Never Fail Fred Metz" master of ceremonies and auctioneer. After supper the crowd danced to the music supplied by Mr. and Mrs. Paul Housler's orchestra. A few real old-time dances were enjoyed.

How's this for a record—Sixteen pupils of Jutland School District had had a perfect attendance during this past cold month.

In last week's paper a very popular man had the pleasure of seeing home two teachers, and says he thinks he was born under a lucky star. But the other day he tells me, "His dreams are getting better all the time. I had the pleasure of seeing home 'The Teacher'." Well, what ya know!

The annual meeting of the W.I. will meet on Thursday at the Lone Pine Hall. Christmas exchange, also drawing of Home and Comfort Magazine. Election of officers. A large attendance is expected. Pot luck lunch.

The entire East communities wish to extend their sympathy to Dr. Evans and family in their recent bereavement in the sudden and untimely death of Mrs. Evans.

Mrs. Clara Wood spent the week end at her home and attended the bazaar.

Everyone is quite busy with Christmas preparations. Scarcely a day goes by when we don't hear of some one who will have slipped past. Time waits for no one. Although there is a famine in parts of the world, we can be so grateful that there is "Peace Among Nations".

#### THIS WEEK—

The Lone Pine W.I. met at the Hall on Thursday, December 6th with fourteen members present. Mrs. Joe Clarke took the chair in the absence of the president, Mrs. Coates. All books were closed for

### NOTICE TO CREDITORS AND CLAIMANTS

In the Estate of AMANDA THOMAN, late of Didsbury, Alberta, Housewife, Deceased.

Notice is hereby given that all persons having claims upon the Estate of the above named AMANDA THOMAN who died on 14th May, 1946, are required to file with the undersigned by 19th January, 1946 a full statement duly verified of their claims and of any security held by them, and that after that date the Administrator will distribute the assets of the Deceased amongst the parties entitled thereto, having regard only to the claims so filed or which have been brought to his knowledge.

Dated at The Court House, Calgary, Alberta, 10th December 1945.

D. L. SLOAN,

Public Administrator for the Judicial District of Calgary.

the year. The election of officers was postponed until the January meeting. A good deal of business was attended to, including the report of the bazaar. Five dollars was donated to the Salvation Army, and ten dollars to the Milk for Britain Fund. Mrs. Rasmussen won the raffle draw. The next meeting will be at the home of Mrs. Alf Thompson. The afternoon closed with a very fine lunch and best wishes for a very Merry Christmas.

Mr. and Mrs. Otto Bittner and family, George Long, Mr. and Mrs. Pete Schumaker, Mrs. Lila Krause and family, were guests at the home of Mr. and Mrs. Walter McCulloch to a turkey dinner Sunday evening.

We are sorry to hear that Mrs. Harold Shultz, Mrs. Otto Bittner, also Mrs. Coates, have all had the flu.

Fred Metz had the misfortune to hurt his leg while moving a granary, but he is still able to be around. There was a real nice turn out at the Jutland school Friday night to see the lantern slides and see the clever yearbook boys who had been in a Japanese Concentration camp.

MONDAY, DECEMBER 17, AT 8:00 P.M.

You are cordially invited to attend these  
Special Christmas Services

D. WYHTE SMITH, minister

## MOST OF US DON'T KNOW

Hardly anyone—not even the publisher—knows how important a newspaper is to a community.

The smaller the town, the more important the newspaper is in its economic life. Its news, editorials and feature stories focus the interest of surrounding territory on the place in which the paper is published.

This force and the force of advertisements by local merchants build an ever-widening trade area. This means more business, more money for schools, homes and churches—a bigger and better town.

A town with a newspaper is a town with a future. The better the paper, the brighter the future.

It deserves the support of every business man in that town.

We are trying to make this paper worthy of our town. Your help and suggestions are appreciated.

## DIDSBURY PIONEER

A Newspaper is More Than a Business—It  
is a Community Institution

### CARD OF THANKS

The Senior and Junior members of the W.A. of Knox United Church would like to take this opportunity of thanking those who made their Christmas Sale such a success.

The Central Alberta Dairy Pool at Olds will buy Turkeys this year at Calgary prices, and producers can pool their birds and receive a very additional benefit from sales made by the Pool.

### NO LETUP ON FARM

Discharges from the armed forces at increased rates, labour released from war plants, to peace time production and unrationed farm machinery are factors tending to ease the farm labor situation, states the Current Review of Agricultural Conditions in Canada. The high levels of agricultural production achieved during the war years through the efforts of Canadian farmers with insufficient labor and machinery have been phenomenal. With sufficient labour and machinery, their effects cannot be relaxed, now that hostilities have ceased, says the Review. Food must be provided for the people of Europe until their own farms are able to produce the necessities of life.

### DIDSBURY DISTRICT HAS CHAMPIONSHIP STOCK AND LIVESTOCK CHAMPIONS

At the banquet held in honor of the Didsbury Dairy Calf Club and the championship team, sponsored by the Didsbury Lions Club on December 6th, Mr. J.W. Wordie gave a resume of the quality herds in the Didsbury District and the men who pioneered in dairying. Below is a resume of what Mr. Wordie had to say to the gathering: First, the quality Holstein cattle in our district were brought from the east by Gordon Manhardt and Arthur Chamberlain. John Liesemer and his brother, Ed Liesemer, acquired some of this stock. Manasch Weber and Harold Brennan also purchased some of these cows. Your chairman, Thos. Morris, has some of this stock today. These cattle laid the foundation for the cows of today who have made such wonderful records across Canada and the U.S.A. John Liesemer sold a calf to Mr. Leeson which was later acquired by Hays & Co. This animal won the All American Championship as a three-year-old in 1942; her name was Nellie Alcarra. John Liesemer still has one of these famous cows, and a cousin to John's cow is the present World's Champion cow producing 1409 lbs. butter fat, beating the world's record of 1402 lbs. butter fat held by one of the Canadian herd at Seattle, Washington. This cow produced 7 to 8 times as much butter fat as the average cow in our district. Quite a record! As most of you know Mr. John Allen raised this cow and it was bought by Hays & Co. when he retired. The name of this cow was Alcarra Gerben.

I am told that Gordon Manhardt looked after the first cow in Canada to hold a record of 30 lbs. butter fat production in one week. So much for the Holsteins. Now for the other classes. Mr. J. R. Stevens introduced, and still has a very fine herd of Guernsey Dairy Cattle, and, as you know, Harvey and his Dad have shown them to advantage. I should say a word here about the Ayrshire cattle. We have some nice herds like the Morton's, Hansen's and Bruce's. Messrs. Hansen and Bruce have shown consistently at the Didsbury Fair, winning many prizes with their Ayrshires. In 1939 the late Norman Clarke brought in his first carload of Jerseys from the Waikiki Farms of Spokane, Wash. This herd is known as the Didsbury Jersey Farms and it has laid the foundation for many good herds in Central Alberta. Mr. Reid Clarke, the leader in our first Calf Club, has won many championships and merit certificates with these Jerseys.

So much for the cattle—and I know I have passed up many with good herds, but not intentionally. At this time I would like to congratulate the championship team of Miss Cleone Webb and Mr. John Parker. We are proud of them. Incidentally John Parker stood second highest in the Dominion judging—quite a record. Didsbury has a splendid record

in the Provincial Dairy Calf Clubs—three times Provincial Champions. This was not luck. It was hard work and perseverance on the part of the members, leaders and supervisors. Our first champions were Tom Clarke and Delbert Levgood—leader, Reid Clark.

Our second champions, Dorothy Bruce and Harvey Stevens—leader, Carleton Leeson. And now we have Miss Cleone Webb and Mr. John Parker under the leadership of Mr. Tom Morris. The supervisors of these clubs were, 1st, Mr. Phillip 2nd, Mr. Parkinson; and of the present team, Mr. McPhail.

These leaders and supervisors are to be commended for their efforts in making the Didsbury Calf Club an outstanding success.

The parents and neighbors who assisted these young people, past and present, in the work of the Calf Club, have much to be proud of. The showing of these calves at the Fair is certainly a credit to the parents and young people taking part. These calves could be shown in any class "A" Fair in Canada for quality, appearance and showmanship.

## WEDDINGS

### BROWN-WIEBE REMMELE-WIEBE

Saturday, December 1, the Bergt Mennonite church was the scene of a beautiful double wedding when the Misses Mary and Louise Wiebe, daughters of Mrs. J. Wiebe, were united in marriage to Messrs. Henry Brown and Herman Remmel, respectively.

Both brides wore trailing veils and exquisite floor-length gowns of white sheer, trimmed with gold beads and sequins and carried bouquets of roses. Mr. Brown was attended by Mr. Ben Penner. Miss Mary Wiebe was attended by Miss Agatha Penner who wore a lovely white dress and carried a bouquet of roses. Mr. Brown was attended by Mr. Ben Penner.

Miss Louise Wiebe was attended by Miss Louise Eckstrand, who wore a beautiful dress of blue silk and carried a bouquet of roses. Mr. Remmel was attended by Mr. Jake Wiebe, brother of the brides.

The bridal party entered the church to the strains of Lohengrin's Bridal Chorus, played by Miss Helen Brown.

Rev. C. G. Neufeld performed the ceremony. A special song, "His Guiding Touch" was rendered by Messrs. Henry and Jake Penner.

After the ceremony a reception was held at the home of the brides, where a delicious luncheon was served.

After a short honeymoon to Revelstoke, Mr. and Mrs. Brown will reside on a farm east of Didsbury. Mr. and Mrs. Remmel will spend their honeymoon in Banff, and will take up residence in Calgary.

The many relatives and friends of the district join in wishing both couples a happy future.

## WHO DOES YOUR PRINTING ?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them.

Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

### FALLEN TIMBER NOTES

The Busy Bees held their usual monthly meeting at the home of Mr. and Mrs. Hans Johnson with a good attendance reported. The sum of \$7.00 was donated to the Community Christmas tree fund.

We notice Stanley Morrison back in the bush on army leave.

Social evening January 4th at the Fallen Timber school house. High school boys are cutting mining props on Saturday, and making a dollar an hour. Ask John Cooper. We would like to suggest to our road makers that this would be a good time to put gravel on our roads in the bush, as the gravel pits are not frozen.

A boy from the nearby was transferred to the Fallen Timber school and as his brand of profanity was out of date in the bush, the notice board in the school promptly took him in hand and showed him what.

Now that the season for annual school meetings and road meetings is coming on we think that a very helpful report of all these meetings should be published in the news items. Some of it would be interesting.

On the Burma Road the other day we saw passing in one hour two trucks loaded with mining props, Harold Morrison going out for the mail on his Farmall, Pl. Home with his car, and a Fordson tractor towing a bull moose. Are we cosmopolitan?

Murdo Campbell and son of Elkton purchased a truck load of calves at the Fair Ranch.

Mr. and Mrs. MacMullan have returned from a short visit with relatives at Red Deer.

Bill Moscovitz is helping Harold Morrison in the timber for a few days.

Mrs. Elmer Hayes visited at the McGaffin home on Tuesday evening.

Mr. and Mrs. John Howton and Joe McGaffin were business visitors in Didsbury on Saturday last. Any district needing Santa Claus apply to Alec Moore of Bergen as his hirsute qualifications are superb.

### IS DEMOCRACY GOING TO SLEEP AGAIN ?

The above was the topic discussed and debated at the meeting of the Didsbury Branch of the Canadian Legion on Saturday last. It is proper for the Legion to discuss such a topic. The members are all ex-service men and women who have lived through the years of their lives, of their health and material welfare. Many of their comrades have given their lives—all for what? What did demand and all the good it stands for might live.

The Legion is idealistic. It does not want war. It wants Peace. But the Legion is realistic. It realizes that the Criminal Code of Canada is still very useful. That there are fools at Fort Saskatchewan and Lethbridge; that a member of the R.C.M.P. is taking over the policing duties of Didsbury. It knows only too well that nations can be criminals as well as individuals. Now, such a short time after the war is over, the Legion views with great concern the recent failure of the Conference of Foreign Ministers in London.

The opinion of the Legion is and has been that a child who maintains adequate defence measures, is at all times prepared to defend itself, is not so likely to be attacked overseas by an aggressor nation. In fact one of the best ways of preventing war in this imperfect world is to be prepared to withstand the aggressor. It will be fatal if we do.

What is the picture in our Town of Didsbury? Almost overnight the Air Cadets are disbanded. We were really proud of that fine body of young men. They had good officers who brought their squadron up to a real peak of perfection. In discipline and physique the credits were much benefited. Didsbury of course may be the only Town where Cadet organizations have been disbanded. So the local Branch of the Legion passed a resolution urging upon the authorities concerned, the vital necessity of maintaining Cadet movements in the interests of the maintenance of peace.

The local detachment of the Army Reserve (Tanks) is without drill hall accommodation. The detachment is very small, but with sixteen new recruits. It is to be hoped that accommodation for the drilling of this force may soon be forthcoming.

Owing to war conditions, lack of leaders mainly, the Boy Scout Troops and Cub Pack had to be discontinued. This movement was sponsored by the Legion. It is not in any sense a military organization, but prepares lads to be good citizens in their life, and throughout the world has been the means of decreasing to a very large extent juvenile delinquency. The Legion wants to see the Scout movement in Didsbury to ahead again, and issues a call for Leaders. The work is interesting and has a mighty fine reward.

FOR SALE — Victory Seed Oats, germination test 97%. Sample at Pool elevator. M. E. Archer, phone 707. 50-2p

WANTED—Green Feed and Hay. For Sale—Pump Engine in A-1 shape. Also Light Bob Sleigh. A.D. Schmidt, phone 49. 1p

# Why VICKS Is So Good For Relieving Miseries of Childrens Colds

More than two generations ago—in grandmother's day—mothers first discovered Vicks VapoRub. Today it is the most widely used home remedy for relieving miseries of children's colds. And here is the reason—

The moment you rub VapoRub on the throat, chest and back at bedtime it starts to work two ways at once—

and keeps on working for hours—to ease coughing spasms, help clear congestion in cold-choked upper breathing passages, relieve muscular soreness or tightness. It promotes restful sleep. Often most of the misery of the cold is gone by morning! That's why VapoRub is so good to use when colds start. Try it!

## Post-War Youth

"IT IS UNDOUBTEDLY TRUE that the hopes of the world are centered now as never before so strongly in the youth of the world," says the October-November issue of The Royal Bank of Canada Monthly Letter. "Young men and women need to prepare themselves for taking over responsibility for the economic and spiritual channels of which are undoubtedly steering the nations, because the strength and safety of communities and nations depend upon their virtue and intelligence. While steadiness will be required in the ranks of all countries, the next quarter century will see an increased demand for fire and initiative in their leaders. The first errors to be swept from the minds of young people are the ideas that days of opportunity are past, and that there is no longer a premium on effort. When executives tell young people starting work that advancement depends upon their own efforts, it is a sincere and serious warning. If youth chooses to disregard the advice of successful businessmen, it must face the fact that the alternative is a totalitarian state government, such as those the democracies have just defeated, or an industrial paternalism. Either is calculated to relieve the worker of the necessity to think, and force him into the ranks of those who do nothing but obey orders and perform the tasks to which they are assigned."

## War Conditions Are Not Normal

"From the standpoint of society, it is obviously desirable that every youth should have the opportunity to become self-supporting and from youth's standpoint it is desirable to encourage and guide the girl and boy to learn and to work efficiently. This latter objective has become distorted by the work and wages condition of war time. Conversion from war to peace conditions of employment will include realization that war conditions are not normal. War habits need to be better. Constant moving from one plant to another will not advance the youth in peacetime. He must learn to be reliable, and to avoid absenteeism. He must have a plan, and guard against the danger of its taking him into an occupation remote from his ability. He needs to place more emphasis on learning than on work, avoid dead-end type jobs, and prepare himself for more than routine. Youth is being aided by the increasing understanding of adults, wider interest of communities, more opportunities for participation in organizations for their own welfare, greater attention by governments, constantly broadening scope of schools, training in private, government, and plant schools, and the guidance offered by unselfish citizens whose only objective is the good of youth and the betterment of society. These efforts and achievements, however, should not induce complacency, because in spite of them youth finds itself at a stage in life."

## Always Room At The Top

Attention is drawn to the fact that even in a settled world, conflict exists all the way from childhood, and the problems of today's young people include, in addition, the let-down from pressures of war, the aspects of reconversion, the need for suitable jobs, and what to do with leisure. The responsibility of adults, the article continues, is to provide the environment in which young people are allowed to be experimenters in culture, and to recognize that this land is full of opportunity, which offers itself to men in proportion to their ability, their will for action, their power of vision, and their knowledge. There is no greater folly than to sit by the roadside waiting for someone to come along and carry one with him to wealth and influence. The spirit of dependence upon others is abhorrent to successful men. They speak truthfully when they say, "There is plenty of room at the top," but they add: "You can't start climbing without first choosing your way to the foot of the ladder." The wise youth, facing the post-war world, will make more opportunities than he comes upon accidentally, and he will find businessmen and educational leaders eager to give a helping hand to anyone who has set his mind on advancement."

## ITCH CHECKED IN 10 MINUTES

The quick relief from itching caused by eczema, athlete's foot, rashes, poisons and other skin conditions, using Vicks VapoRub. It is the most widely used home remedy for relieving miseries of children's colds. And here is the reason—

## 1 Peaceful Country

Chile Has Not Been At War For Seventy Years

Chile is a peaceful country. She has not been engaged in a war for more than 70 years. Her people are convinced that treaties freely signed or arbitration are the only equitable means of settling differences that arise among nations. They have always relied upon these measures and are eager for having done so because they know the future will reward their efforts. Today Chileans are good friends of those with whom yesterday they had bitter differences.

The Chilean international ideal, as a country of peaceful democracy and one which relies upon law for a minor power, is equal respect for the full sovereignty of every state. Chilean Gazette.

## Price Control And Rationing Information

Q.—We have been told by several of our customers that our Christmas and New Year's meals, which we will be serving in our restaurant, must be strictly "meatless." Have not the meatless day restrictions been lifted for these two days?

A.—Public eating places may serve anything they wish on Christmas and New Year's days.

Q.—Do we need special permission from the Wartime Prices and Trade Board to sell handkerchiefs such as aprons and knitted goods at our church bazaar?

A.—When these handkerchiefs are sold for charitable purposes at church bazaars, special permission is not required.

Q.—Is the sale of whipping cream still banned?

A.—The butterfat content of cream is still limited to 18 per cent, and whipping cream is still therefore not on the market.

Q.—Will I be able to obtain sugar for my bees?

A.—Sugar for feeding of bees will be granted only to beekeepers who produce honey for sale and who have registered with the Federal Administration as primary producers of honey. A maximum of 15 pounds of sugar per colony will be granted in the fall only. No sugar will be provided for spring feeding. Beekeeper's Sugar Purchase Permit is issued by Provincial Apiarists.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

## War Was Unnecessary

Winston Churchill Says The Last One Could Have Been Stopped

Winston Churchill, former British Prime Minister, told the Belgian Senate that he would like to see a United States of Europe bound together in "property, justice and peace," and added that "the tragedy of Europe shocks me entirely."

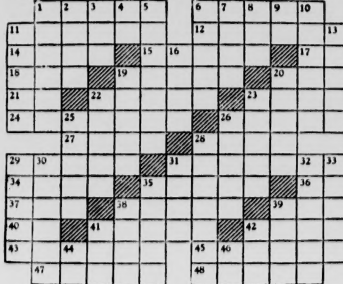

The Second Great War might have been prevented "if the United States had taken part in the League of Nations, or if the League of Nations without the United States, had used force on a European basis alone," he said.

Mr. Churchill received the freedom of the city and was enthusiastically cheered by Belgian crowds.

He said he would call the last war "the unnecessary war." Hitler, he said, "could have been stopped in the early days of his aggression."

Emperor Wang Mang, about 1 A.D., nationalized Chinese land and distributed it in equal shares among the peasants.

## The Stilwell Road

Has Served Its Purpose And Jungle Will Reclaim It

The Stilwell Road, which in the latter days of the war in the Orient formed the very lifeline of Chinese resistance, has been abandoned because, according to official announcement, "it cannot be maintained economically in peacetime."

Short months ago, says the Sherbrooke Record, the Stilwell Road was the scene of a heroic struggle against time, nature and the enemy. Men sweated and cursed, fought the jungle and the Japs, bled and died to open this lifeline to blockaded China before the Japanese should break through the weakening Chinese resistance.

Now the jungle will reclaim it, and the world will gradually forget the effort and lives that went into its construction. It is surplus property like the engines of war that rolled over it, produced in such profusion and now obsolete and uneconomical.

But although the Stilwell Road may disappear, its story forms part of a tragic history that cannot be obliterated.

It is the history—written in every war—of lives and work and money spent in prodigal extravagance of scale that cannot be counted and waste that must be ignored, of things supremely necessary in war and utterly worthless in peace.

## New Fabric

Cloth Has Now Been Developed From Chicken Feathers

Cloth development made from chicken feathers, the new fabric is designed to be used in suits, dresses, sweaters and other wearing apparel. It looks like wool and is said to be warmer, softer and lighter than wool.

It can be dyed any color and can be laundered in soap and water with no more shrinkage than cotton. In production of the yarn, the fine elements of the feathers are separated from the quills by a specially designed machine and are then mixed with other fibres and spun into yarn. Feathers from ducks, geese, turkeys and other fowl, manufacturers claim can be utilized in the same way as chicken feathers. DuVal Ambassador.

## MOST IMPORTANT

Christian Science Monitor says another Hitler lives relatively unimportant. The political-military machine he controlled has been broken and he could not rebuild it. The important question is whether Hitlerism lives. In Germany there has been much disillusionment, if not repentance. But there is altogether too much evidence that large quantities of poison remain.

## Chapped Lips

Mentholatum keeps lips soft and moist, relieves dryness and itching, soothes and protects. Excellent also for chapped cheeks, nose, throat, and lips. 30c.

MENTHOLATUM Gives COMFORT Daily.

## 100 MILES per HOUR on FIRESTONE SYNTHETICS

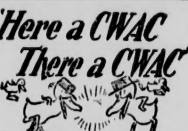

Yes, you can be sure of Firestone tires standing up to any practical speed you will travel. Wilbur Shaw, the famous race driver, definitely proved that for you in an actual speedway test.

Shaw drove for 500 miles at an average speed of 100 miles per hour—on the straightaways—he hit 115 miles per hour.

Not a skid or blowout occurred in this grueling test—equal to 50,000 miles of ordinary driving.

You may never want to drive at 100 miles per hour but it's mighty comforting to know your Firestone tires have the reserve strength and stamina to stand up to any demand you could ever make of them. When you are able to buy tires on having Firestone Deluxe Champion tires on your car.

## Firestone DeLuxe CHAMPION TIRES

## Here a CWAC There a CWAC

MEET A CWAC—

Pte. Mary Moynihan, daughter of Capt. and Mrs. Moynihan, 2084 Monique street, Regina, has recently received her discharge from the Canadian Women's Army Corps. Mary joined the CWAC at Regina, in October, 1942, and worked for a short time in the C.W.A.C. Orderly Room in Regina before leaving for Montreal to join the Canadian Army Show.

After attending rehearsals all winter she went on a tour across Canada with the show, and as a member of "B" Unit of the Canadian Army Show, went overseas in Dec. '43, playing in England and to the front line troops in Italy. During the five months in Italy, "B" unit played more than 200 shows, often two and sometimes three shows a day. Several times they played within a few yards of the front lines, in the midst of enemy shelling. Roughing it out, the showmen were kept supplied on petrol tins as beds. Pte. Moynihan said they often had to wash and clean up with only water enough to fill a mug.

It was while she was in Italy that Pte. Moynihan and her friend Raymond Mirande of Montreal had an audience with Pope Pius XII, being the first service women to do so. His Holiness was rather puzzled as to where they came from, because he had never seen a Canadian Woman's Army Corps uniform before. When told that they were Canadians, he said, "How very interesting. I am always glad to meet Canadians."

Returning first to England, Pte. Moynihan arrived back in Canada in Dec. '44, where after a short leave with her parents, she toured Eastern Canada with the Army Show. Leaving the show in April, '45, Pte. Moynihan worked in the C.W.A.C. Orderly Room, Twenty Barracks, Toronto. In her spare time, Miss Moynihan is at present attending the Toronto Conservatory of Music, where she has enrolled for a three-year course in voice, piano, theory and language, and recently received an audition with the Canadian Broadcasting Company.

## ARMY EXPERIENCE HELPS TO MAKE CWAC BETTER CITIZENS

To Major Melville's way of thinking, any girl who has been a member of the Canadian Women's Army Corps will be a better citizen. The Army has taught them to soldier well, and has also been a lesson to them in the many different trades, and above all the value of co-operation and discipline. Though the largest number of girls were trained to get out to civilian life again, they were willing to wait until they were relieved of their work by the return of overseas veterans. Major Melville endorsed the idea of some sort of peace time training for women. The volunteer corps have done an excellent job of providing the war recruits for the army during this war. Major Melville retired

recently after four years' service, and has gone back to her home in Lethbridge, Alta., where she will go back to housekeeping for her husband, who was a flight lieutenant during the war.

## CWAC SIGN THEIR NAME

The Canadian Women's Army Corps Units in Saskatchewan went over the top by 2357 in the 5th Victory Loan drive, according to Lt. Mary Jane Oliver, United Chairman and Assistant Chairman for the District. Miss Oliver tops the list by buying a \$1250 bond.

## GEMS OF THOUGHT

### PEACE ON EARTH

Peace is the healing and elevating influence of the world. — Woodrow Wilson.

Peace rules the day, where reason rules the mind. — William Collins.

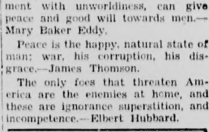

If it be possible, as much as lieth in you, live peaceably with all men. — Romans 12:18.

Only what feeds are fills the sentiment with unworries, can give peace and good will towards men. — Mary Baker Eddy.

Peace is the happy, natural state of man; war, his corruption, his disgrace. — James Thomson.

The only foes that threaten America are the enemies at home, and these are ignorance, superstition, and incompetence. — Elbert Hubbard.

## Beneficial Effects Of Better Nutrition May Bring Greater Need For Agricultural Products

LOOKING down the road the broad vision discloses the possibility of an expanding demand for the products of agriculture and fisheries as the beneficial effects of improved nutrition become known and understood, Dr. F. P. Tisdall, Toronto, Chairman of the Committee on Nutrition, Canadian Medical Association, told the Canadian Delegation to the United Nations Food and Agriculture Conference recently held at Quebec City.

An increased demand for essential products produced in Canada is therefore envisaged within Canada itself and also through the world, he said. Whichever way better feeding is considered, whether from the viewpoint of increased food production or from the standpoint of improved health it will pay handsomely. Dr. Tisdall recalled some of the more important advances that recent studies have disclosed. A study made early in the war showed that where the rations of the armed forces were not of the best both from the quality and quantity standards that after four days men were so deteriorated mentally and physically that they were not a match for an army of 14-year-old properly fed boys.

The feeding of foods of high nutritive value definitely advances learning ability. It has been found that certain feeding procedures during acute illnesses can definitely shorten the period of convalescence.

Length of life is also affected by proper feeding, he said. Foods of high nutritive value not only retain vigour, but also lengthen the span of life.

The rate of growth of a man or woman is also affected by diet. A recent survey made disclosed that freshmen presently at the University of Toronto were 1 1/2 inches taller and 5 1/2 pounds heavier on the average than the freshmen at the same University 20 years ago. The improvement in the freshmen of the present time over those of two decades ago was probably due to better diet.

The Canadian Armed Forces during the war, and also now, had the highest rating of milk of any armed forces in the world—20 ounces per day and the advantages of this are abundantly evident.

Referring to the shipments of canned meats that are being sent from Canada to the devastated countries of Europe, Dr. Tisdall said calcium is needed as well as protein. It is not possible for the people in those countries to obtain cow's milk, which is high in calcium, in sufficient quantities, so it must be supplied by something else, such as fresh bones. The human race thousands of years ago depended on bones to supply the calcium for their diet. Today fresh bones are largely used in Canada for animal feed and for fertilizers. Fresh bones can be ground and added to canned meats and so substantially increase the calcium content. The introduction of bones in canned meat for human consumption will add vital elements to the diets of peoples and mean millions of dollars to farmers. Ordinary canned meats contain about 29 per cent. of moisture and protein and fresh bones with the meat adhered to them have about 16 per cent. protein in addition to their high calcium content.

The British Government recognizes the importance of nutrition for children. In Britain school lunches of nutritive foods are being provided to 33 per cent. of children and it is hoped shortly to provide such lunches to 75 per cent. of children attending schools throughout that country. The improved nutrition of the children is expected to be of far reaching value.

Recently facilities have been provided for feeding an additional 7,000,000 industrial workers in the United States under government sponsorship at comparatively little cost. This will mean not only better health, but greater efficiency of the workers.

Dr. G. S. H. Barton, Deputy Minister, Dominion Department of Agriculture, who was head of the Canadian delegation at the FAO Conference said that the broad field of nutrition research throughout the world, with which Dr. Tisdall and Dr. Collip are actively identified in Canada, through discoveries which have already been made in this country alone indicate what such work can mean in terms of human welfare and in the additional demand for essential foods.

### Served Their Purpose

Mock Airfields Drew More German Raids Than Real Ones

A network of 500 dummy cities, airfields, shipyards and other targets so realistic they blazed at night under enemy attack caused thousands of tons of German bombs to drop harmlessly into open fields during the Battle of Britain, the air ministry disclosed.

Mock airfields drew even more raids than the real ones—443 compared with 434 on actual installations. The fields appeared so genuine that Allied pilots had to exercise great care to avoid trying to land on them.

A conservative estimate credits the decoys with drawing 10 per cent. of all bombs, incendiaries and mines dropped at night during the war," the ministry said.

### Attack Predicted

Raid On Pearl Harbor Foretold By Late U.S. Navy Secretary

The late Navy Secretary Frank Knox predicted on Jan. 21, 1941, that if war between the United States and Japan occurred, hostilities might begin with a surprise attack upon the Pacific fleet or the naval base at Pearl Harbor.

His prediction was made in a letter to Henry L. Stimson, then secretary of war, and was disclosed in an exchange of correspondence made public by a congressional committee investigating the Dec. 7, 1941, attack on Pearl Harbor.

The letter was dated more than 10 months prior to the Japanese strike at the base.

"In my opinion," Mr. Knox wrote, "the inherent possibility of a major disaster to the fleet or naval base warrant taking every step as rapidly as can be done, that will increase the total readiness of the army and navy to withstand a raid of the character mentioned above."

Mr. Knox envisaged six hazards which he listed in the following order of importance: Air bombing attack, air torpedo plane attack, sabotage, submarine attack, mining and bombardment by gunfire.

Defence against all but the first two of these dangers appears to have been provided for satisfactorily," he wrote, adding that he considered the solution of the two types of aerial attack of "primary importance."

With urgency, the navy secretary told Mr. Stimson any such Japanese attacks probably would be launched from a striking force of carriers and supporting vessels, with the probable maximum enemy effort put at 12 aircraft squadrons, and the minimum at two.

### Age Of Civilization

Believed To Date Back 8,000 Instead Of 4,000 Years

Discoveries made by archaeologists in Iraq have disclosed that human civilization dates back to a considerably earlier period than had been previously believed.

According to the new evidence, civilized man has inhabited the earth for 8,000 years, instead of the 4,000 years previously supposed. So it is that human civilization, at one leap, has increased its antiquity by about one third.

Unusually such a discovery is of great scientific interest. But in these days man is looking anxiously forward rather than in retrospect. We should no doubt be grateful to the orientalist for having given us another 2,000 civilized years in the past. But how much greater our gratitude would be if they could only assure us of another 2,000 years of civilization in the future.

In short, we would like to be sure that the scientists are not extending one civilization at one end and cutting it off at the other. Montreal Gazette.

### For Social Welfare

Aga Khan To Donate Twelve His Weight In Diamonds

The Aga Khan, head of millions of Moslems in India and Africa, will be weighed in diamonds on two occasions next year to mark his diamond jubilee as leader of the Islamic Moslems.

The ceremonies, carried out for charitable purposes, will take place in Bombay March 29 and at Dar Es Salaam, Tanganyika, April 17.

The Aga Khan weighs some 245 pounds and it is believed diamonds weighing that amount will be worth approximately \$1,600,000.

The custom is for the Aga Khan to devote to social welfare projects a sum equal to the value of his weight in diamonds. The money to be distributed in India and West Africa will be used for interest-free loans to small farmers and for higher education.

### SOME OVERLOOKED

In a recent Commons address, Prime Minister Attlee mentioned nearly every group that had had anything to do with winning the war. He made one exception: he forgot Gen. Eisenhower, Field Marshal Montgomery and the other generals! The former Prime Minister, Mr. Churchill, refreshed Mr. Attlee's memory, and gently rebuked him. By the name told, it seems that Mr. Churchill himself was not unworthy of inclusion in the list!

Pasteurized milk is the only safe milk.

ONLY LADY TEACHER ON SCHOOL CARS IN CANADA — Mrs. Helen MacKay of North Bay, Ont., will be out of a job one of these days and she won't mind a bit. The man who replaces her will be the man she replaced. Mrs. MacKay is the only woman school car teacher in Canada, replacing her husband who quit teaching to enlist in 1941. The railway car has all the comforts and Mrs. MacKay visits five settlements on rotation basis. Here she summons the class.

### THE WHITE RACES

"White races are not really white." On July 22, 1947, the son of Mr. According to the Encyclopedia Britannica, the skin-color is actually a land, then in the Merchant Navy, combination of yellow and black pig placed a letter addressed to his parents, enclosing white tissues and red cents in a bottle, along with money. Little from the blood circulating for postage, and dropped it into Wall through the skin. In allusion, the lady, Mrs. South Australia, last black pigment is missing and only a July 28 a small boy found the little small portrait of the yellow pigment is present. Britannica.

### TOOK MANY YEARS

A poem submitted to a Boston firm was entitled "Why Do I Live?" It was returned with note reading, "We regret we cannot use your poem. But we can answer your question. It is that the bomber should be dropped when it had served its purpose. Instead of delivering it in person."

## British Scientists Discovered That Germany Intended To Launch Rocket Missiles At U.S.

(E. G. Shepherd, London Sunday Times)

GILBERT assumes that Germany intended launching rocket missiles against the United States and Canada have now been examined by British scientists having full access to German sources of information. They have concluded that the Germans could have sent a winged rocket 3,000 miles only if they had been free to continue the development work. Apparently the process was so wasteful it would have severely limited the scale of such attacks.

### The Reason Why

Horses Lose Their Coats In Wintry Weather

A newspaper has been asking how it is that, while we put on overcoats for the winter we strip the horse by clipping its hair.

The answer is that the animal's heavy coat is Nature's provision for winter in a state of shelterless freedom. When wild or at liberty horses do not constantly exert themselves by galloping; their grazing habits make it necessary for them to move slowly. Moreover, they have to lie in the open so the heavy covering which the horse grows in autumn is essential to health and comfort.

When horses are set to work, however, their efforts make them hot; and if they were blanketed in a great mantle of hair they would sweat intolerably, and then, having to stand still for long intervals, would run the risk of severe chills before their coats dried. So we strip their coats for their comfort while at work, throw a rug over their loins when they are standing in the open in harness, and at night give them blankets to take the place of Nature's protective covering. Thus the horse is prevented from being overheated when at its toil, and safeguarded against cold when at rest.

### EASY TO ANSWER

A poem submitted to a Boston firm was entitled "Why Do I Live?" It was returned with note reading, "We regret we cannot use your poem. But we can answer your question. It is that the bomber should be dropped when it had served its purpose. Instead of delivering it in person."

### Meat Ready For Shipment

### Faced Big Problem

German Architects Found Way To Dispose Of Berlin's Rubble

Trees in the Tiergarten, Berlin's central park are to be chopped down for firewood and the park will be used as a dump for bomb-damaged rubble, according to German architects who are drawing up plans for the reconstruction of Berlin. Once the rubble has been spread over the surface, the area will be replanted to produce a sort of elevated park.

The scheme was hit upon after a survey indicated that it would take ten daily trains of fifty cars each six years to cart all of the rubble out of the city. Since this was impossible, the only alternative was to leave the rubble in the city.

The process of sorting this trash has been going on steadily for six months. Bricks are wrapped and stacked and used for new construction. Girders and other metal pieces are salvaged for scrap, forming the main source of raw material for the Berlin metal industry. Whatever cannot be used will be dumped in the Tiergarten under the proposed plan.

It would cost \$5,000,000 to build Berlin completely. Allied sources estimate. Out of 1,500,000 family dwelling units in existence in 1939, only 600,000 were still intact by the summer of 1944. Of the rest, 400,000 had been totally destroyed and 800,000 damaged. There was further destruction during subsequent air raids and in the Battle of Berlin. — New York Herald Tribune.

Buy War Savings Stamps regularly.

To obtain range, wings would have been necessary. By adding wings to a rocket of V-2 dimensions, the range could have been increased by 2,000 miles. The investigators presume that in this modified rocket the warhead would be replaced by a pressure cabin from which a pilot would take over control when the contraption descended to some 25 miles above the earth, and controls became effective, causing it to glide at a relatively flat angle for over 2,000 miles while losing the remaining 25 miles of height.

The whole 3,000-mile flight would take 45 minutes. During its ascent, the rocket aircraft would reach a speed of nearly 8,000 miles an hour. At the top of the climb it would be 170 miles above the earth's surface, having travelled forward about 370 miles. On its descent to a level at which the pilot could take over, it would have travelled about 450 miles more before the wings and elevators could get leverage for long glide.

Till then the living aircraft would have been travelling downwards at 4,500 miles per hour. The speed would be gradually reduced by the flattening of the glide and the resistance of the air until at last the pilot would land the craft at a speed of 70 miles per hour.

Fuel would be burned for less than five minutes. The actual V-2 carried fuel for a burning period of only one minute. Sufficient fuel to push a rocket aircraft above the 60-mile height of the V-2 to the 170-mile height required by a long-distance rocketcraft could only be carried in an auxiliary rocket usually called a "booster." The Germans intended that the booster should be dropped when it had served its purpose.

The booster needed for a trans-Atlantic flight would weigh about 100 English tons. Probably not less than 100,000 extra pounds of fuel would be required and an auxiliary rocket or booster capable of containing and heating that fuel would be large and quite costly.

The cost per mile of this trip between England and America would necessarily be high. The commercial prospects of rocket-driven flight are not bright because of the high rate at which fuel must be consumed. Rocket flight at the present stage of development is forced to use great heights to obtain range.

If less bulky or more efficient fuels can be found, an alternative method of covering long distances would result. This would involve a climb to a comparatively low level—possibly about 18 miles above the earth—where air resistance is small and level speeds of 1,500 miles per hour can be maintained on a much smaller output of rocket thrust. The application of atomic energy to this purpose, if that proves possible, would bring the long-range rocket into an entirely new category. Without some fresh advance along that line, rockets remain the most expensive means of locomotion.

For military purposes the Germans quite seriously contemplated attempting to send rockets to North America (though they hoped to recover the empty boosters when dropped). The British have examined these projects and have down the German rocket-driven aircraft which went into action. They have also investigated plans for driving fighter aircraft up at a remarkable rate of climb to attack bomber formations. The most spectacular was one of the latter, which was to climb to 40,000 feet in three minutes and be abandoned by the pilot after he completed the attack.

### Did Grand Job

Nurses Serving In Blood Clinics Worked Long Hours

Now that the terrible urgency of blood donations has ended, tribute should be paid to a group whose service has been so generously required. In the clinics were nurses, both professional and volunteer, who endured wearing toil through long hours to build up the blood when it was needed. They went about their work quietly, efficiently and with efficiency, so unobtrusively that they have been almost forgotten.

It is to these women that a major share of the credit for the success of the blood donation system belongs. — Windsor Star.

### EXPORT TRADE HIGH

Canada's total export trade to the British West Indies which was around \$14,000,000 in 1939, rose to \$19,000,000 in 1944, and is expected to reach \$24,000,000 in 1945.

## McCullough's Clothing

Mrs. E. Pearson was a Calgary visitor the first of the week.

Cecil Shields, who is attending high school in Calgary, spent the week end at his home south west of town.

Mr. and Mrs. C.S. Sandford of Bearberry were Didsbury visitors last week and Stewart purchased a load of seed oats from Cliff Thayer, east of town.

The first league hockey game will be played at Didsbury on Monday evening, December 17th, when the Carstairs team will play the locals.

The public address system was installed at the Didsbury Skating rink last Friday.

J. F. Moir who operated the store at Westcott for 25 years before he disposed of the business this spring, and who has been in Eastern Canada for the past six months, has returned to Calgary and came out to Didsbury last Thursday to renew old acquaintances.

Mr. and Mrs. A. Traub left Tuesday for a visit to Eastern Canada and expect to be away two or three months.

### DIDSBURY HOSPITAL BIRTHS

Born at the Didsbury Municipal Hospital on Friday, December 7th, to Mr. and Mrs. F. Cummings, a daughter.

To Mr. and Mrs. J. Hendricks on Monday, December 10th, a daughter.

To Mr. and Mrs. D. Cassidy on Tuesday, December 11, a daughter.

### NEWS FROM THE WEST

Mrs. Hasegood Sr. is a Calgary visitor for a few days this week.

Mr. B. Parker who visited his brother last week returned to his home at Barrhead on Sunday. Mr. Ed Parker is staying at the home of Mrs. O. Krebs, and Mrs. Krebs has Mrs. Heiner and children of Westcott as visitors.

Mr. and Mrs. H. Parke left on Monday for a trip to Ontario where Mr. Parke's sister is very ill. Mrs. C. Yarnes is also planning to spend Christmas in Ontario. She left last week.

The Elkhorn Willing Workers held their annual social evening and sale of work last Friday evening in the school when \$50 was cleared to provide funds to carry on the coming year. Mr. O. Blain was the winner of the quilt, and Mr. Campbell, as usual, was the auctioneer, which helped greatly to the success of the sale.

### CHRISTMAS GREETING ADS FOR NEXT ISSUE

The December 20th issue of The Pioneer will be devoted mainly to Christmas Greeting Advertisements together with the usual run of local news, and advertisers are reminded to prepare their copy immediately and hand it in to this office as early as possible in the week. It may not be possible to canvas every business place for advertising in this issue, but we are issuing this warning so that anyone wishing to put in a greeting ad will have the opportunity of doing so.
